¹Based on test conducted in rooms facing west direction (PR40)

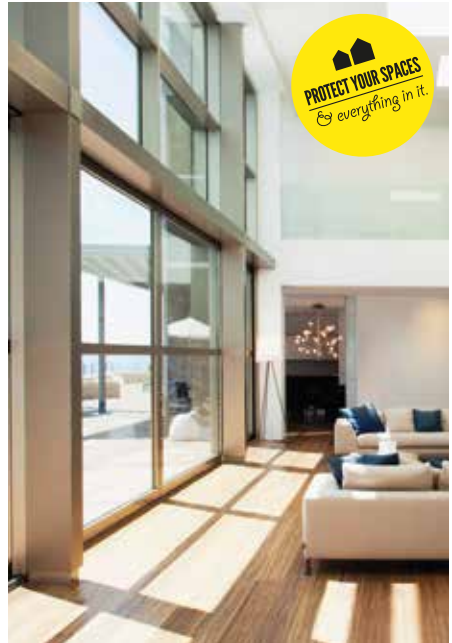

3M™ Sun Control Window Films

Prestige Series

BENEFITS

- Clear film with excellent heat rejection that outperforms many darker films from other brands
- High visible light transmission allows natural day light to enter the house without the heat
- Low interior and exterior reflectivity enhances views while maintaining exterior appearance, making it suitable for installation in condominiums and ECs.
- Extends the life of furnishings by reducing 99.9% of harmful UV rays, the largest cause of fading
- Metal-free design means no signal interference and no chance for film corrosion
- Backed by premium 3M manufacturer’s warranty. 15 years warranty for fixed and sliding panels, 3 years warranty for casement panels. Warranty covers peeling, bubbling, blistering, delamination and discoloration.

	PR20	PR40	PR50	PR60	PR70
Visible Light Transmitted	21%	40%	51%	61%	69%
UV Rejected	99.9%	99.9%	99.9%	99.9%	99.9%
Infrared Rejected*	97%	97%	97%	97%	97%
Total Solar Energy Rejected	62%	60%	56%	52%	49%
Total Solar Energy Rejected - On 60 Degree Angle	65%	66%	63%	61%	59%
Glare Reduction	76%	55%	44%	31%	22%
Visible Light Reflected (Exterior)	6%	7%	8%	7%	8%

Performance data generated using applicable industry test methods and standards.

*Infrared Rejected - Measured on film only from 900nm to 1000nm.
